

THE UNIVERSITY *of* EDINBURGH
COLLEGE OF SCIENCE
AND ENGINEERING

Academics Unplugged

Bite-sized research, in twenty minutes

An opportunity for researchers to introduce their work to staff and students from across the College.

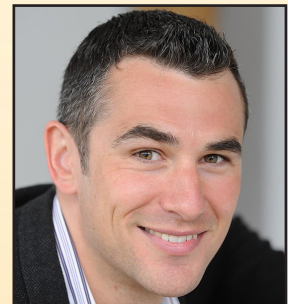

There are over a thousand researchers working across the King's Buildings campus. And yet, much of the time the rest of us are unaware of their work, how it relates to other research, or how it may meet the challenges in contemporary society.

The talks will take place between 1.10 and 1.50pm: each takes the form of a twenty-minute presentation, followed by the opportunity for the audience to discuss the subject further with the speaker.

Each talk will end with a link to further information on the speaker's area of interest, so that you can delve into the subject in more detail.

Dr Philip Hands

Lecturer & Chancellor's Fellow
Institute for Integrated Micro & Nano Systems
School of Engineering

Liquid crystal lasers:

from displays to anti-counterfeiting and biomedical imaging

1.10pm, 3 November 2016

Joseph Black Building

Theatre 250
