

THE RENEWABLE STRATEGY ENGINEERING PRIZE: BEST INDIVIDUAL PROJECT COMPETITION

Prize: £1,000

Sponsored by Renewable Strategy Limited

Awarded by the Offshore & Upstream Engineering Committee

The 2016 Renewable Strategy Engineering Prize is now open. The winner of this annual competition will be selected from the best individual project in a mechanical engineering topic related to offshore renewable energy.

A unique opportunity particularly for young engineers to:

- Get noticed by presenting projects to peers, colleagues and senior managers
- Gain experience in presenting, refining presentation & communication skills
- Development by enhancing CV and developing competencies for CEng application

Competition entry guidelines

To be eligible, the project must contain a substantial mechanical engineering component, be an individual effort and be concerned with offshore renewable energy.

- The competition is open to students and graduate engineers of all ages - Undergraduate students (BEng, BSc, MEng), Post graduates (MSc, MRes, PhD) & Industry based engineers
- Eligible candidates should submit an electronic copy of their final year thesis/report by **19 August 2016** with a covering letter describing how the report relates to mechanical engineering and offshore renewables
- Shortlisted candidates will be invited to present their projects to a panel at IMechE HQ, London, on 13th September 2016
- The final decision will be announced two weeks later with the prize formally awarded at an upcoming IMechE Offshore & Upstream Engineering Committee event (tbc)

Renewable Strategy Ltd (RSL) is a leading renewable energy boutique advisory firm with offices in UK and South Africa. RSL provides innovative operational software solutions such as the **RSL O&M Manager** in the on and offshore wind space, currently installed as the operational maintenance tool on more than 400MW of renewable power plants. RSL's core offering includes asset management of renewable plant, inspections audits and strategic advice. Powered by experience, innovation and insight.

RSL works across the renewable sector with owners, operators and supply chain partners, project developers, finance providers and government. With vast experience in high profile renewable power generation RSL marries technical know-how with practical solutions. Find out more at www.renewablestrategy.com
